

## ■ Guaranteed Items

No.	Test Item	Conditions
1	Vibration	Frequency 10 to 55 Hz, Total amplitude 1.52 mm, 1 minute/cycle, 3 directions, 1 hour for each, Total 3 hours
2	Free fall	3 times onto a hard wooden board, Height shown by *1.
3	Soldering heat resistance	Terminals is dipped in solder at a temperature of 260 °C for 10 seconds.
4	Thermal shock	1cycle -40 °C/30 minutes to +85 °C/30 minutes, Total 10 cycles
5	Humidity resistance	Temperature +45 °C, Humidity 90 to 95 %, Time 48 hours

\* 1

Type	Height
(surface-mount type)	75cm
(lead-mount type)	30cm
(type with a built-in transformer)	
Conventional filter	

■ A variety of tests checks the reliability of the product and ensures the level of guaranteed quality reliability is maintained.  
The test items shown above are guaranteed as standard.
