

■ How to Determine Specifications

When ordering quartz crystal units, please specify the following specifications.

If no specification is specified, NDK's standard values will be used. In addition, when manufacturing crystal units, we will manufacture them within the required specifications based on the following specification items.

We may not be able to meet unpredictable operating conditions or excessive circuit margins not specified in the specifications, so please contact us in advance.

| | |
|--------------------------------|---|
| (1) Model name of holder _____ | (5) Frequency tolerance (at 25±3 °C) ± _____ ×10 ⁻⁶ |
| (2) Nominal frequency _____ Hz | (6) Frequency temperature characteristics (IEC) ± _____ ×10 ⁻⁶ |
| (3) Overtone order _____ | Operating temperature range _____ °C to _____ °C |
| (4) Load capacitance _____ pF | (7) Other requirements _____ |
